ASPHALT PAVEMENT ASSOCIATION OF NEW MEXICO

The Asphalt Pavement Association of New Mexico (APANM) was formed to represent the interests of the asphalt pavement material producers, paving contractors and agencies requiring asphalt paving in New Mexico. APANM will support an active approach to improve the quality of asphalt pavements and paving techniques used in the construction of roads, streets, highways, parking lots, airports, and environmental and recreational facilities. APANM's goal will be to help its members learn the latest technology, understand environmental issues, gain market share, and receive training.

APANM will promote the improvement and advancement of quality asphalt pavement construction, provide assistance to members in the areas of research, technical specifications, environmental issues, education, promotion, government relations, and other related areas and educate potential buyers and specifiers of asphalt pavements as to the pavement's characteristics and benefits. APANM will work to assure that quality HMA remains the dominant product for both the construction and rehabilitation of New Mexico roadways.

For more information, contact the Asphalt Pavement Association of New Mexico.
