

# Applications Now Open

## Engineering Ambassador Program

The NMSU College of Engineering Ambassador Program provides a unique experience for undergraduate students to gain leadership skills, support STEM recruiting and outreach activities, deepen knowledge and understanding of local, state, national, and global challenges, and engage with industry to explore career opportunities.

Ambassadors are selected through an application process, based on their interest to serve and represent the NMSU College of Engineering, a desire to broaden leadership skills, and a commitment to ethical values.

**Deadline for Submissions: April 15**

Information and Applications available online
