# Margot Lee Shetterly

Margot Lee Shetterly's "Hidden Figures" was a No. 1 New York Times bestseller, a USA Today bestseller and a top book of 2016 for TIME and Publishers Weekly. The film adaptation of the book – starring Taraji P. Henson, Octavia Spencer and Janelle Monae – recently became the No. 1 movie in America.

In her keynote, Shetterly talks about race, gender, science, the history of technology and more.

A 2014 Alfred P. Sloan Foundation Fellow, Shetterly is a graduate from the University of Virginia. She is a researcher, writer, entrepreneur and founder of the Human Computer Project, a digital archive of the "Human Computers" of NASA whose work helped move the country forward in the golden age of space travel.

Alongside her husband, Aran Shetterly, Margot also co-founded the magazine "Inside Mexico."
