

Biology Seminar Series Fall 2017

Thursdays 4pm - Room 231, Foster Hall

Date	Speaker	Host	Affiliation	Title
8/24	Amanda Luna	Department	NMSU Biology	Safety Seminar
8/31	Ana Foronda	Pitrsiak	Instituto Pirenaico de Ecología-CSIC	<i>Spatial distribution of vascular plants and biocrusts in gypsum plant communities of the Chihuahuan Desert (New Mexico)</i>
9/7	Charles Shuster	Shuster	NMSU Biology	<i>Thinking about cell shape change</i>
9/14	Maria Castillo	Castillo	NMSU	<i>Thinking about snail immunity</i>
9/21	Phil Rivera	Unguez	Massachusetts General hospital	<i>The role of inflammation on addiction-like behaviors in mice</i>
9/28	Anita Quintana	Unguez	UTEP	<i>Elucidating the function of the cholesterol synthesis pathway during development and disease.</i>
10/5	Michael Moody	Bailey	UTEP	<i>Ecology, population genomics and transcriptomics of local adaptation; ascertaining the prospects for the dominant plants of the arctic tundra under climate change</i>
10/12	Jonas G. King	Xu	Mississippi State University	<i>"Using a molecular toolkit to address broad-ranging questions in host-pathogen systems</i>
10/19	Fitsum Gebreselassie	Xu	NMSU	<i>Overview of capture-recapture models</i>
10/26	EHS			<i>Lab Standard Safety Refresher</i>
11/2	Brian Millsap	Roemer	NMSU	TBA
11/9	Richard Cripps	Curtiss/NMSU-HHMI	UNM	<i>Uncovering conserved mechanisms of muscle development and disease using the Drosophila model system</i>
11/16	Donovan Bailey	Bailey	NMSU	<i>TBA"Reconstructing the Evolutionary History of Plant Families, Genera, and Genomes"</i>
11/23	Thanksgiving			
11/30	Geoffrey M. Attardo	Hansen	UC Davis	<i>'Tsetse Fly Reproduction: Exploration of the Unique Physiological Adaptations of a Neglected Disease Vector</i>
12/7	Akasha Faist	Nish	NMSU	TBA
